

Sagem-Interstar Launches XTrax 5.5 Fax Workflow Software for Its Cisco-Compatible XMediusFAX FoIP Server

Sagem-Interstar will be unveiling Release 5.5 of its XTrax IP fax workflow software at the CIPTUG 2007 event next week to complement its recently launched XMediusFAX Fax over IP (FoIP) 5.5 solution. The XTrax solution facilitates viewing, searching, processing, OCR scanning, routing and archiving of faxes, creating an audit trail for regulatory compliance and optimized fax management.

Montreal, Canada, October 23, 2007 – [Sagem-Interstar Inc.](#) (SAFRAN Group), the global leader in boardless IP fax software for VoIP networks since 2002, will be demonstrating its new XTrax fax workflow solution at the upcoming Cisco IP Telecommunications Users Group (CIPTUG) event being held October 29 to November 1, 2007. Deployed with its market-leading XMediusFAX T.38 boardless FoIP server, Sagem-Interstar's XTrax (Release 5.5) solution enables organizations of all sizes to better manage and track their fax workflow to enhance productivity, reduce costs, and facilitate compliance with regulations (e.g., HIPAA, SOX) governing the security, accountability and confidentiality of their information flow.

The CIPTUG 2007 Annual Conference, held at the Austin Convention Center in Austin, Texas, is an annual event that focuses solely on Cisco IP Communications products and targets the CIPTUG user community, Cisco customers and partners. (Sagem-Interstar: Booth 430)

"With Unified Communications on the rise, Sagem-Interstar is well poised to maintain its leadership in the VoIP market as the IP fax vendor with the largest* number of boardless T.38 FoIP integrations on Cisco equipment," said Jean Champagne, General Manager of Sagem-Interstar. "Our XMediusFAX and XTrax FoIP solutions for VoIP deployments are field-proven, reliable and crucial building blocks for a comprehensive Unified Communications infrastructure. Our 'one-stop' approach to delivering IP fax technology quickly and economically adapts to the evolving IP Telephony needs of all types of corporate, government and service provider accounts."

** Source: According to fax industry analyst Davidson Consulting, Sagem-Interstar is the boardless FoIP pioneer, and since 2002 grew its #1 market position in T.38 boardless fax server solutions to more than a 75% market share.*

As a Cisco Technology Developer Partner, Sagem-Interstar will be spotlighting XTrax 5.5 alongside its XMediusFAX 5.5 – the VoIP industry's first fax server to interoperate with Cisco MGCP VoIP gateways, in addition to SIP and H.323 support. XMediusFAX 5.5, launched in September 2007, features enhanced Active Directory integration, as well as support for VMware, XML metadata, and Cisco MGCP VoIP gateways.

XTrax 5.5, also equipped with enhanced Active Directory support, enables users to optimize desktop faxing by offering easy-to-use capabilities for viewing, searching, processing, OCR scanning, routing and archiving of faxes. Network administrators can effortlessly import existing users and user groups for centralized and efficient user administration and authentication. This decreases deployment costs and boosts employee productivity.
