

Sagem-Interstar to showcase award-winning XMediusFAX and SAGEM ATAs at European Cisco event

Sagem-Interstar demonstrates its pioneering T.38 boardless IP fax server software this week in Spain and unveils another new product for customers migrating to VoIP.

Montreal, Canada, January 21, 2008 – [Sagem-Interstar Inc.](http://www.sagem-interstar.com) (SAFRAN Group), the global leader in boardless IP fax software for VoIP networks since 2002, announced today that it will showcase its award-winning XMediusFAX Fax over IP (FoIP) server technology at the prominent Cisco Networkers 2008 conference (Booth E68), being held January 21 to 24 in Barcelona, Spain.

Launched in September 2007, XMediusFAX Release 5.5 is the VoIP industry's first fax server to interoperate with Cisco MGCP VoIP gateways, in addition to offering SIP and H.323 support. XMediusFAX 5.5 features enhanced Active Directory integration, as well as support for VMware, XML metadata, and Cisco MGCP VoIP gateways.

As a Cisco Technology Developer Partner and a technology leader in the Cisco VoIP community, Sagem-Interstar exhibits at Cisco events worldwide. With thousands of deployments in more than 40 countries, the Cisco Compatible XMediusFAX prevails in the global market as the fax server with the largest number of boardless T.38 FoIP integrations with Cisco equipment.

Also featured at this event will be a sneak peek at the SAGEM Fax ATA (Analog Telephone Adapter) 101S – a new product for customers migrating to VoIP and who want to leverage investments in existing analog fax devices. The SAGEM Fax ATA 101S enables companies to protect investments in fax machine fleets and to eliminate analog connectivity requirements, while gradually transitioning to MFP devices that tightly integrate with central IP fax server solutions like XMediusFAX.

“This conference gives us yet another opportunity to demonstrate our technology leadership in the Cisco VoIP community,” said Jean Champagne, General Manager of Sagem-Interstar. “From our market-dominating XMediusFAX IP fax server to the new SAGEM Fax ATA 101S, we’re providing customers with the industry’s most cost-effective, state-of-the-art fax solutions for full and seamless integration within Cisco-powered Unified Communications environments.”

About XMediusFAX FoIP and Cisco MGCP

XMediusFAX caters to organizations of any size. Whether they have deployed or plan to deploy a VoIP telephony infrastructure, XMediusFAX enables organizations to *FAXimize* their Cisco IP network. Field-proven to manage large fax volumes and deliver high levels of reliability and availability, XMediusFAX connects to Cisco voice gateways via SIP or H.323. XMediusFAX is tested compatible with Cisco's T.38 Fax Relay via the following Cisco VoIP gateways: 1700, 1800, 2600, 2800, 3600, 3700, 3800, 7200, 7300, and 7600 CMM Series; and AS5300, AS5400, and AS5800 Series.
